Wallpaper Engine

The screenshot shows the 'Monitor 1' application interface. At the top left is a sidebar with sections for 'Installed' (1 item), 'Discover' (1 item), and 'Workshop'. Below this are search and filter options. The main area displays a grid of wallpaper thumbnails. A central modal window titled 'Choose Monitor' allows selecting a wallpaper for a specific monitor. The modal includes a dropdown menu for 'Layout' (set to 'Wallpaper per monitor'), two preview images (one for 1280x1024 resolution and one for 1600x1050 resolution), and buttons for 'Change Wallpaper' and 'Remove Wallpaper'. To the right of the modal is a detailed view of a selected wallpaper titled 'Surrealism' by 'Shawn'. This view includes the wallpaper's title, author, type (Scene), tags (Fantasy, 1920 x 1080, Everyone), rating (4 stars), and a red 'Unsubscribe' button. On the far right, there are 'Properties' and 'Scheme color' settings, as well as alignment, position, and playback rate sliders. At the bottom right are 'OK' and 'Cancel' buttons.
